

ERTH Products

ERTH (Environmental Resource and Technology for Humanity) Products, L.L.C. is one of the largest compost manufacturing facilities in the southeast. As ERTH's logo and motto states ERTH Products is "Changing the Way the World Grows" with their registered trade mark product, ERTH FOOD. ERTH Products obtained its solid waste handling permit in 1992 and today ERTH Food is licensed as an organic fertilizer and soil amendment in 16 states.

ERTH Products, L.L.C. specializes in organic waste recovery, compost manufacturing, sales and marketing of mulch and soil products and in the engineering of specialty soils for storm water management, water conservation and sustainable building projects. The company's 240,000 square ft. manufacturing facility is located on 230 acres just outside of Plains, Georgia. ERTH products diverts over 60,000 tons of biosolids (approximately 5,000 truck loads) a year from the landfills and produces over 65,000 cubic yards of finished composted material for beneficial reuse. The compost, mulch and specialty soils are used throughout the green industry by landscapers, commercial and residential property owners, sod and agricultural farms, golf courses, wholesale and retail nurseries, growers and by architects and engineers involved in sustainable green building products.

ERTH products believes the environmental benefits of diverting organics previously destined for landfills speaks for itself but even more important are the benefits that can be derived from using these organics to engineer soil and develop functional landscapes that protect our natural resources most important of which is water.

The company's president and co-owner Wayne King has helped lead the way in environmental programs and composting in Georgia. He has served as a board member of the United States Composting Council since 1997 and now serves as the council's president. In 2000 Wayne founded the Georgia Composting Association where he served as its president for three years. Wayne has also served as the chairman of the Georgia Green Industry Association and currently serves as a board member of the University of Georgia Odom School of Ecology. ERTH Products continues to partner with numerous associations on waste recovery and environmental matters including the Georgia Recycling Coalition, The Georgia Association of Water Professionals, Georgia Water Wise, Georgia Sustainable Partners and the Georgia Green Industry Association.

ERTH Products is proud to have received recognition for its work in the environmental area and has been awarded the:

- 1999- 1st place in Keep Georgia Beautiful Reduce, Reuse, Recycle category presented by Governor Barnes
- 2000- Georgia Green Industry Association's "Environmental Friend of the Industry" Award
- 2002- U.S. Composting Council's "Composter of the Year" Award
- 2003- Southern Nursery Association "Environmental Leadership Award" for 16 states
- 2007- U.S. Composting Council's "Clean Water Award"
