

SP Newsprint LLC

SP Newsprint LLC, headquartered in Atlanta, GA was the first company to recycle old newspaper into newsprint in the South. Formed in 1977, SP Newsprint is one of the nation's largest producers of recycled newsprint. Our Dublin, GA mill produces 100% recycled content newsprint on its 2 paper machines and our Newberg, OR mill which was acquired in 1999 produces a 50% recycled content sheet of newsprint. The two mills consume more than a million tons of old newspaper per year.

SP Newsprint utilizes state-of-the-art processes and equipment to recycle old newspaper back into newsprint which the sales department markets to newspapers from small rural weeklies to large metropolitan both in the US and foreign countries. With the onset of single stream SP Newsprint added a drum pulper and made other adjustments in the recycling process allowing the mill to be able to accept some office grade paper and magazine blended in with the old newspaper to make new newsprint.

The recycled content newsprint produced by SP Newsprint is high quality newsprint whose brightness and pressroom performance compete successfully in the marketplace with other recycled content and virgin fiber newsprint.

SP Recycling Corporation was formed in 1980 as a wholly owned subsidiary of SP Newsprint LLC. SP Recycling collects processes and ships high quality material from our 26 processing facilities in 12 states. SP Recycling sells over a million tons of paper to our two Sp Newsprint mills. SPRC also sells 350,000 tons a year of other recyclable materials into domestic and export markets and provides processing of 80,000 tons of materials for other companies. SPRC supports local recovery of paper by offering a fundraising collection partnership with non- profits and communities.
